IT, Encryption, CCTV and Radio Communications

Nabishi UK was established in 1990 to provide an efficient and cost effective approach to communication networks, security products and related services.

We steadily grown to become a leader in the design and installation of radio communications, Speech security (encryption) cctv and IT systems with a range of dynamic equipment and services from small to wide area networks.

We compliment our systems with the latest products tailored to individual needs and requirements.

We strive at all times to provide our customers with an unrivalled service. Our success has been built on fulfilling client needs,

with the solutions to help make successful communications which are affordable, productive with minimum of maintenance.

In providing these solutions we seek at all times to implement cost efficiency, high quality work, and co-ordination of design through to installation.

Our systems aim to provide ease of use, reliability and above all professionalism in order to deliver effective communication.

“Our aim is to provide service and equipment of unmatched quality - without compromise”

Professional Excellence Within The Communication Environment The professional manner in which an organisation conducts itself has become an integral part of today's businesses for their success.

The demand for well thought-out radio systems and equipment that help bring effective communication and interaction between people.

During this time we have seen the development of new technologies, coupled with an increasingly demanding market for the most advanced radio equipment and solutions.
